Dear Sir/Madam,

I have a real interest in the job posting for UI/UX Design and UI Developer with your company. I have 8+ years of hands-on experience in the Design field.

My goal is to secure a position with a stable company such as yours where I can put my experience, training, and skills to good use.

I have extensive knowledge of UI technologies that include HTML5, CSS3, and JavaScript front-end coding. I also have the knowledge to create interactive media design using XD/Figma/Sketch/Photoshop and the skills to turn these visual designs into HTML5 and Front-end framework codes.

I have the ability to create interesting Web/Apps UI while keeping them user-friendly. I have excellent time management and organizational skills with the ability to meet tight deadlines.

I am a self-starter with the ability to take control of the situation and work independently to get the job done. However, I am also a team player and I enjoy sharing ideas and information with other professionals in order to get the best possible results for all projects.

The attached resume contains a complete look at my educational background and works history along with my personal skills most relevant to this position.

I can be reached anytime via my cell phone, +971(0)50 1676 892 (WhatsApp), or by email at shafeekali.ktdi@gmail.com

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Respectfully,

Shafeek Ali. P
